## Enabling better decisions for the health of patients and the practice of radiology

---

vRad Analytics: GPI (Global Practice Information) Report  
prepared exclusively for:

### Acme Radiology Group

Your vRad Account Manager: Adam Smith  
Contact Information: 800.737.0610

---

### ABOUT YOUR GPI REPORT:

This report was created exclusively for your practice. It provides a year-to-date monthly rolling snapshot of the teleradiology studies vRad has read for each of your facility(s) and also the studies read by your practice. It is an example of the type of unique information available from partnering with vRad.

GPI Reports provide a monthly 24x7 look inside your radiology practice (On-Site and Teleradiology) by leveraging access to vRad's clinical data repository. You'll get a complete and integrated picture across your facilities of key information, including access to findings-based metrics on all of your radiology studies using vRad's state-of-the-art NLP (natural language processing) tools.

Your personalized GPI Report is a first and important step to help you make informed decisions to lower costs, improve quality and provide exceptional patient care. Your commitment to Final Interpretations with vRad now gives you the option to *see inside your data* – and turn information into action for your practice.

Please let your vRad Account Manager know if you have any questions or comments to share.

Thank you.

For compliance and privacy purposes, QA data is not included via email in your GPI Report. **To access your specific facility(s) QA data, login to our client portal at: [access.vrad.com](https://access.vrad.com).**

## Enabling better decisions for the health of patients and the practice of radiology

### FAQs About Your GPI Report:

**Q: What timestamp is used within the GPI Report?**

**A:** The GPI Report uses the "Exam Time" which is the time the picture was taken at the modality, in the client's specific time zone. For example, a study that was taken on November 30th at 11:30 pm (local time zone) will be represented as study volume for the month of November within the report.

**Q: Why might the study count in the GPI Report differ from the study count on the invoice?**

**A:** The GPI Report utilizes "Exam Time" (the time the picture was taken at the modality) while the vRad invoice uses "Distributed Time" (the time the report was distributed to the facility). In addition, calculations are used to determine costs associated with certain types of studies (such as CT Abdomen/Pelvis) on the invoice. Therefore, study volumes may vary.

**Q: Why are there multiple instances of the same referring physician in my report?**

**A:** The GPI Report may be reflecting the non-normalized data being provided by your practice or hospital's information systems. For example, Dr. Smith may be referred to in multiple ways, i.e. Dr. Smith, Dr. smith, Dr. J. Smith, Dr J Smith, etc. We would be happy to assist you in creating a consistent nomenclature so that your GPI report can be as useful as possible.

**Q: Am I able to request additional information from or make changes to my GPI Report?**

**A:** The GPI Report is a free monthly standard document, updated with your practice's information. vRad has additional radiology analytics solutions that include customization options. Please speak to your Account Manager to discuss your requirements.

**For more information or to talk to an expert advisor at vRad:  
Call 800.737.0610**

#### vRad Snapshot

**vRad is a global telemedicine company and the nation's leading radiology practice.**

- Founded 2001, an affiliate of MEDNAX (NYSE: MD)
- 350+ U.S. board-certified and eligible radiologists, 75% subspecialty trained
- 2,100+ hospital, health system and radiology group facilities served
- Over 14,000 daily reads – totaling 5 million+ annual studies
- U.S.-based, 24/7 operations and technical support center
- Largest PACS implementation worldwide – moving over 1.3 billion radiology images annually
- The largest – and only – radiology patient care benchmarking platform (vRad RPC Index): 30 million+ studies, growing at 400,000 per month
- 15 issued patents highlighting innovation in telemedicine workflow; additional patents pending on data normalization, efficiency in workflow coordination, and deep learning applications within telemedicine.
- Frost & Sullivan Visionary Innovation Award Winner: Medical Imaging Analytics - North America
