## Virtual Radiologic Develops PACS Specifically for Teleradiology

### *Software System Will be Used Internally to Increase Efficiency and Lower Costs*

MINNEAPOLIS, Apr 13, 2009 (BUSINESS WIRE) -- Virtual Radiologic Corporation (NASDAQ: VRAD), a leading global provider of teleradiology services, has received U.S. FDA clearance for the Company's own developed Picture Archiving and Communication System (vRad PACS). Virtual Radiologic will roll out the software to its affiliated radiologists over the next several months, gradually replacing the commercial software it currently licenses.

Virtual Radiologic has over 135 contracted affiliated radiologists located across the nation who will interpret over two and a half million diagnostic images this year through its teleradiology technology and proprietary workflow platform. vRad PACS incorporates a number of features suggested by these radiologists for ease of use and reading efficiency.

"vRad PACS completes our strategy of developing our own software to precisely fit the business processes and needs of Virtual Radiologic," said Rick Jennings, chief technology officer of Virtual Radiologic. "Our teleradiology technology platform has been 'designed by radiologists for radiologists', which we believe provides a significant competitive advantage. In addition, since we now fully control all major components of our platform, we can continue to innovate with even greater speed and flexibility."

### About Virtual Radiologic

Virtual Radiologic Corporation ([www.virtualrad.com](http://www.virtualrad.com)) provides teleradiology solutions to radiology practices and medical centers throughout the United States and internationally. Utilizing market-leading, proprietary workflow technology, Virtual Radiologic physicians perform preliminary and final read interpretations for emergent and non-emergent needs - day or night, 365 days a year. Virtual Radiologic's American Board of Radiology-certified radiologists are collectively licensed in all 50 states. Virtual Radiologic is The Joint Commission-certified and serves over 620 clients supporting more than 1,025 medical facilities.

### Safe Harbor for Forward-Looking and Cautionary Statements

Certain statements in this press release are "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, including, in particular, statements about our plans, objectives, strategies and prospects regarding, among other things, our business and results of operations. These statements involve a number of risks, uncertainties and other factors that could cause actual results, performance or achievements of Virtual Radiologic Corporation to be materially different from any future results, performance or achievements expressed or implied by these forward-looking statements. For examples of such risks and uncertainties, please see our Annual Report on form 10-K, as well as our other filings with the Securities and Exchange Commission. Except as required by applicable law, Virtual Radiologic Corporation undertakes no duty to update these forward-looking statements due to new information or as a result of future events.
